

## Calibo's readiness check for self-service platform implementation

Are you ready to set up your self-service platform solution? Use this checklist to ensure you have everything in place internally.

- Do you have C-suite buy in?
- Has the senior leadership agreed on an implementation plan? Are they clear on any organizational changes needed, and what input is needed from their side?
- Does your business IT operating model support agile delivery? If not, what are the next steps?
- Do you have an in-house tech team (platform engineers, solution architects etc.)? If not, consider Calibo's personnel professional services.
- Do you have a platform implementation partner?
- Are you clear on the technical requirements (Cloud, data lake, governance)?
- Has the business decided if you're going with a self-managed or fully managed platform?

**Don't worry if you can't check all of these boxes!  
We're here to help if you have any questions or would like  
to discuss any of these steps further.**
